FILE-X Document Imaging Services Helps Healthcare Industry Answer President's Call

Tuesday January 27, 10:36 am ET

KING OF PRUSSIA, Pa., Jan. 27 /PRNewswire/ -- In his State of the Union address, Jan. 20, President Bush discussed the serious challenges facing the nation, including making health insurance more affordable and accessible. A key step in doing this, he said, is computerizing health records to reduce costs, improve care, and lower the risk of medical mistakes.

It may seem a simple solution to some, but those in the healthcare industry know the truth -- the job of converting to a computerized system is complex. Although most records created in the past few years may exist in an electronic format, the majority of health records are paper. Doctor's offices, surgical centers, and hospitals are overwhelmed with paper records and need a way to fuse the past with the present.

King of Prussia-based FILE-X Document Imaging Services is helping the healthcare industry answer the president's call. By providing paper-scanning services for health systems, hospitals, and doctor's offices, and then working to integrate the new electronic data into a client's existing system or a virtual filing cabinet, the imaging bureau has helped many organizations find a way to reduce healthcare costs.

"We're excited President Bush is focusing on this aspect of reducing healthcare costs," says Joe Fagan, vice president of FILE-X. "Paper documents are slow, inefficient, and costly. It's time for the healthcare industry to get onto the information superhighway, and we can help them do it."

INDUSTRY CONTACTS:

FILE-X can provide expert testimony from the document imaging industry. FILE-X can also provide contacts in the healthcare industry who wish to discuss the benefits of converting paper documents into electronic format.

ABOUT FILE-X:

FILE-X Document Imaging Services, Inc. is a full-service, solutions-oriented, imaging bureau. FILE-X specializes in affordable conversions of both hardcopy paper documents and microfilm/fiche into easily stored and accessed digital images. A family-owned business founded in 1996 with facilities located near Philadelphia and Harrisburg, PA, FILE-X focuses on identifying the most flexible and cost-effective way for its customers to operate in a "paperless" business
